## BENEFITS & FEATURES

- Compact unit requires floor space equivalent to one pallet
- Labor saving - minimal operator involvement (approx. 20 seconds per tray load) to remove / position each tray
- Quick and simple product change over
- Fully automatic control and monitoring functions with 'tray full' warning strobe
- Handles any container size and most shapes
- Capable of packing up to 3,500 bottles per hour
- Optional support frame configurations including bi-directional infeed conveyor, height adjustment and mobility features to accommodate different production line layouts, plus layer inversion facility.
- Easily integrated with existing down-stream testing and conveyor lines, with optional CAS on-line leak & vision testers
- Compatible with CAS take-out 'robots' to place containers onto the infeed conveyor
- May be used with CAS pallet elevator for complete pallet building
- Consistently reliable and repeatable operation
- All CAS equipment is covered by copyright design
